

SUMMARY

I am a committed Computer Science student with a solid foundation in competitive programming and full-stack development. My experience encompasses a variety of projects which highlight my capability to provide effective solutions. Proficient in several programming languages, I am also enthusiastic about mentoring others in the field of technology.

EDUCATION

Institute of Science and Technology
B.Sc. in Computer Science and Engineering
2021 - Present

COMPETITIVE PROGRAMMING

- **Regionalist:** ICPC Asia Dhaka, 2024 and 2025
- **Finalist:** NCPC Final Round, 2023
- **Champion:** IST Battle of Brains, 2025
- **IUPC Highlights:** BUET 2024, UU 2025, UAP 2023, CUET 2025
- **Codeforces Max Rating:** 1202, Handle: **sadimahmud225**
- Participated in **150+ contests**; solved **1000+ problems** across multiple online judges

SKILLS

- **Languages:** C/C++, Dart, Python, JavaScript, TypeScript, SQL
- **Frameworks & Libraries:** Flutter, Riverpod, GetX, Node.js, Express, Socket.IO
- **Databases & Cloud:** MongoDB, Firebase (Auth, Firestore, Realtime DB), Cloudinary
- **DevOps & Tools:** Git, GitHub, GitHub Actions, CI/CD, Nginx, VPS deployment REST APIs
- **Computer Science:** Data Structures, Algorithms, OOP, Databases

EXTRACURRICULAR

Programming Club of IST

Executive Committee Member 2022 – 2023

- Organized programming contests, workshops, and seminars; mentored junior members in competitive programming.

PROJECTS

pcIST Platform

Club Management Suite: [APK](#), [App Repo](#), [Backend Repo](#).

- **Full-stack platform** for digitalizing club activities, with **event and member management** and **event gallery** implemented using **Cloudinary**.
- **JWT/OTP authentication**, **role-based access control**, and **API request validation using Zod**.
- **real-time** features: **Admin chat**, **FCM push notifications**, **Contest tracking** system for 30+ CP platforms.
- **Automated PDF generation**, email workflows, and **task scheduling**.

Technologies: Node.js, Express 5, MongoDB, Mongoose, Flutter, GetX, Puppeteer, Cloudinary, Firebase FCM, Socket.IO, JWT, Nodemailer, Agenda, Zod, Dio.

Dhaka Plastic & Metals
(Development & Production Contribution)

E-commerce Production System: [Live Site](#), [Customer Site Repo](#), [Backend Repo](#).

- **Led end-to-end production deployment** for a full-stack e-commerce platform (**customer site**, **admin panel**, **API**).
- **Established a complete CI/CD pipeline** using GitHub Actions and SSH automation for the **VPS environment**.
- **Delivered 30+ features**, including staff analytics dashboards, performance chart and payment installment system.
- Applied **comprehensive SEO** (meta tags, Open Graph, URL canonicalization via **Nginx**).

Technologies: TypeScript, React, Node.js, Express, REST APIs, GitHub Actions, CI/CD, Nginx, VPS, SSH, cPanel, SSL, SEO, Webmail, Mobile Optimization

ChatterBox

Real-time Messaging App: [Git Repo](#)

- Built a peer-to-peer messaging app with **Social graph features & Social networking functionality**, private chatrooms, and **real-time presence tracking**.
- Enforced **Firebase Authentication** and **Firebase for persistence**.

Technologies: Flutter, GetX, Firebase Authentication, Cloud Firestore, FlutterFire CLI

MediCare

Hospital Management System: [Git Repo](#)

- A multi-role app with **state management** and **business logic implementation** using **Riverpod**.
- **Appointment scheduling** with **double-booking prevention** and role-based access control via **Firebase**.

Technologies: Flutter, Material Design, Riverpod, GetX, Firebase Authentication, Cloud Firestore, SharedPreferences, Custom Theming
